

## **Reablement Services**

Sometimes people just need a short-term package of care. Whether it is to support you during a short period of illness, helping you to get back on your feet following an operation, or even to help build your confidence after a fall. We can design a highly personalised care programme to reable you or your loved back to full health and independence. Whether you need support with your personal care requirements or daily living activities, Orchid Care can help.

Our specialist reablement teams work alongside healthcare professionals to make your transition from hospital to home as smooth as possible.

Our reablement service is flexible, meaning the level of support you receive can be adjusted to meet your changing requirements. As your condition improves and your support needs decrease, we can step-down the level of care you receive.

We aim to actively support you to regain your independence as quickly as possible and avoid the need for costly ongoing care.

If you would like more information about our services and how we can support you or your loved one, please contact your local branch who will be happy to assist.
