

Coping with a terminal condition can be a difficult and painful time for everyone. At Orchid Care, we are committed to delivering a sensitive and caring service that enables our customers to remain comfortable and supported in their own home, surrounded by their loved ones.

Our dedicated End of Life care teams are specially trained to support those with terminal conditions, and work closely with the relevant health care professionals to ensure the best possible care.

We ensure a small team of care staff provide compassionate end of life support that is tailored to the individual needs of our customers and their families; providing assistance with personal care and practical tasks, focussing on: maintaining dignity, supporting customers to be comfortable at all times, assisting with pain management, empowering our customers to have control over how and where their care is provided, delivery of sensitive person-centred care that supports the wishes and aspirations of our clients and their loved ones.

End of Life Care is carried out under the full guidance and instruction of your clinical and medical professionals

If you would like more information about our services and how we can support you or your loved one, please contact your local branch who will be happy to assist.
